

AQUASOLUTION Range

STEP 1
PEEL+
For exfoliating skin
Removes dead skin cells and other impurities; exfoliates dead skin cells from the skin, keeping the skin clean and smooth.

STEP 2
SEBO+
For acne prevention
Removes excess sebum and dead skin cells; removes excess oil, blackheads and other impurities, maintaining moisture levels of the skin.

STEP 3
REJUVE+
For smooth skin
Hydrates and nourishes the skin. Infuses hyaluronic acid and antioxidant-rich ingredients, nourishing and moisturising the skin.

STEP 4
ELECTROPORATION
For enhanced delivery of ingredients
Provides an effective and direct route to the deeper layers of the skin by transdermal motion.

STEP 5
MICRO-CURRENT
For skin tightening and face slimming
Boosts elastin and collagen regeneration by conducting low electrical currents to the skin and facial muscles.

STEP 6
COOLING/HEATING
For faster skin repair process
Stimulates blood circulation to help reduce skin hypersensitivity.

AQUAPURE

What is AQUAPURE facial?

AQUAPURE is a non-invasive hydro-facial treatment that delivers clearer, more hydrated, refreshed and younger-looking skin.

AQUAPURE is ideal for all skin types and targets uneven skin tone, oily/congested pores, dehydrated and dry skin, fine lines, and wrinkles.

The treatment uses three different solutions: for exfoliation, sebum control and collagen production.

This three-step treatment cleans, refreshes and adds moisture and volume to the skin.

Aquapure delivers powerful natural ingredients directly to various layers of your skin to promote a rejuvenated, brighter and more glowing complexion.

Your nourishing, refreshing facial that delivers immediate results without discomfort or downtime.

-  Powerful deep-cleaning facial for hydrated and glowing skin
-  Deep serum infusion technology for skin rejuvenation
-  Perfect companion treatment: boosts the benefits of all other skin treatments
-  Gentle and effective

Is AQUAPURE right for me?

AQUAPURE is ideal for all skin types. It targets uneven skin tone, oily/congested pores, dry and dehydrated skin, fine lines and wrinkles. Its treatment programs boost skin elasticity, and deliver nutrient-rich solutions to all layers of the skin.

How long does AQUAPURE facial take?

AQUAPURE facials take approximately 30 minutes. There is no downtime or recovery time.

Are there any side effects?

Minor side effects, though rare, may include temporary redness or swelling caused by AQUAPEEL's micro-abrasive peeling function. These can last from 1-2 hours to a few days following treatment. However, this treatment is a great way to rejuvenate your skin with non-invasive, non-ablative methods.

Clinical Cases

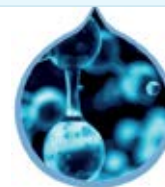

Honey Extract

Accelerates the rejuvenation and healing process for a rapid recovery.

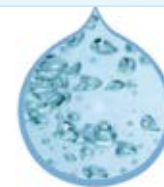

Centella Asiatica

Peptide Complex

Boosts collagen & elastin production to promote healthy, youthful skin.

Hyaluronic Acid

Papaya

Peels away impurities and dead skin for effective exfoliation.
