

FREQUENTLY ASKED QUESTIONS

WHAT SKIN CONDITIONS DOES CHINA DOLL FACIAL TREAT?

China Doll Facial targets acne, blackheads, open pores, oiliness, mottled and dull complexions and reduced collagen. It can help to reduce the premature signs of skin ageing.

HOW DOES CHINA DOLL FACIAL IMPROVE THE SKIN?

China Doll Facial is a unique skin rejuvenation treatment that uses Pastelle's lightning-fast nano-second laser technology applied to medical grade carbon to stimulate and clear the pores and promote the growth of collagen.

WHAT RESULTS CAN I EXPECT?

China Doll Facial will visibly brighten your skin and tighten your pores. Below the surface, collagen production will be stimulated, and you will see further improvement to your skintone. Fine wrinkles can also appear smoother.

WILL CHINA DOLL FACIAL SUIT MY SKIN TYPE?

China Doll Facial can be used on all skin types. The number of treatments required for best results will depend on your individual condition. Your therapist will advise you.

HOW WILL THE TREATMENT FEEL?

You will be aware of a warm, slightly 'prickly' feeling in the treatment area, but China Doll treatment is not painful. You can return to normal activities immediately after your treatment.

For best ongoing results, you should maintain a healthy lifestyle, and protect your skin from direct sun exposure. Always cover up and use a good SPF sunblock when out in the sun.

PEEL AWAY DULL SKIN

STEP 1

Your skin is thoroughly cleansed to remove all make-up and sebum, and tape is placed across your eyebrows to protect them. A thin layer of carbon cream is applied to the skin. This will act as a photoenhancer during your China Doll Facial treatment.

STEP 2

The entire area is then treated by the Pastelle laser light, which is absorbed by the carbon on the skin's surface. The carbon cream is shattered and blasted from the skin, taking the dirt, oil and dead skin cells from the epidermal layer, helping to contract the pores.

STEP 3

You will experience a difference immediately, in tighter, more hydrated and radiant skin. Your skin will also be stimulated to produce collagen, the building blocks for younger, firmer skin. This provides long-lasting improvement to the underlying structure of the skin.
