

FREQUENTLY ASKED QUESTIONS

HOW DOES A SECRET DUO TREATMENT FEEL?

A prickling sensation as the skin tissue is heated. A numbing cream may be applied to the target area prior to treatment depending on your skin concerns.

WHAT HAPPENS DURING A TREATMENT?

The synergic approach of RF micro-needling combined with non-ablative laser makes for a deluxe treatment with therapeutic elegance.

Treatment is commenced with the finest medical grade gold plated micro-needles are used to deliver RF energy between sections of healthy tissue to stimulate collagen; the building blocks for healthy, rejuvenated skin. Skin cells are stimulated and the underlying skin tissue is heated without causing damage to the epidermis to produce new collagen and elastin.

The non-ablative laser causes thermal injury within the dermis leaving the epidermis intact limiting side effects and recovery time and improving clinical results.

HOW MANY TREATMENTS WILL I NEED?

The typical interval between sessions is once every 3-4 weeks. This may vary according to your skin concerns and what we are aiming to achieve. A course of treatment is recommended for best results.

HOW SOON WILL I SEE RESULTS?

You can start to see results in skin quality within a few weeks, but your skin will continue to renew itself and look even better after a few months after your last treatment. Most patients see excellent results following 2-4 treatments. An improvement in skin texture and tone, wrinkle reduction, skin lifting and tightening, improved appearance in atrophic scars, active scars and stretch marks.

Patients ultimately will achieve healthier, younger and fresher looking skin.

This new combined non-ablative fractional resurfacing technique makes it a much gentler process with significantly reduced recovery time comparing to the conventional ablative fractional laser.

SECRET DUO INDICATIONS

- › Non-ablative skin resurfacing
- › Acne scars
- › Atrophic scars
- › Active acne
- › Wrinkle reduction
- › Skin lifting and tightening
- › Tone and texture improvement
- › Pore reduction

Secret DUO

MICRO-NEEDLE FRACTIONAL RF SYSTEM WITH ER:GLASS LASER

**ACHIEVE HEALTHIER, YOUNGER
AND FRESHER LOOKING SKIN.**

SEE & FEEL THE DIFFERENCE

STEP 1

Advanced DUO technologies of micro-needling combined with laser triggers intense skin rejuvenation for skin cells to renew themselves. This new advanced therapy induces collagen production for skin remodelling deep and superficially within the skin layers, targeting a multitude of ageing concerns in 1 single treatment.

STEP 2

An intensive cell renewal is triggered in the skin's deeper layer (dermis) while a gentle resurfacing in the superficial layers (epidermis) delivers superior results with faster recovery. As collagen is produced at these levels, the skin's texture and tone improves and becomes smoother and fresher.

STEP 3

The result is healthier, younger and tighter looking skin. You will notice continuous improvements for the following months after treatment. Don't forget to wear SPF 30+ ongoing to maintain your glow.

In some circumstances, Secret Duo treatment might need to be postponed. You should seek medical advice if any of the following apply to you:

- You have tanned skin
- You have an implanted device (e.g. Pacemaker)
- You are using photosensitive drugs (e.g. Roaccutane)
- You are pregnant or breastfeeding
- You have any active skin infections
- You are taking a blood thinner medication

WHAT IS SECRET DUO?

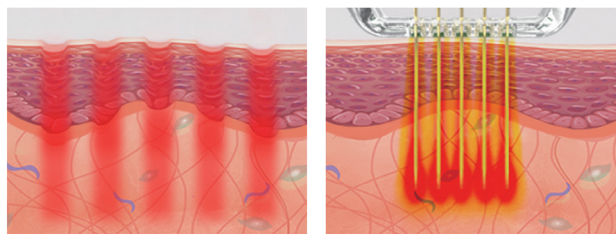

SECRET DUO offers dual non-ablative fractional technologies of micro-needle RF and 1540nm erbium glass laser in a single device as a total aesthetic solution for a wide range of skin concerns. These two technologies can work individually or in combination treatment to give the optimal treatment flexibility to all patients.

BENEFITS AND ADVANTAGES OF SECRET DUO

SECRET DUO provides a novel treatment combination that delivers more efficient clinical results with virtually no downtime and very minimal side effects. With SECRET DUO, patients typically experience continuous improvements for the following 6-months after the last treatment is done, with higher satisfaction and without disrupting daily activities.

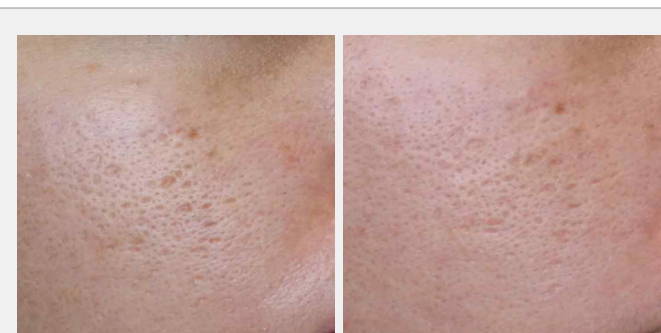

NON-ABLATIVE SCAR REMODELLING AND SKIN IMPROVEMENT

SECRET DUO offers dual non-ablative fractional technologies of micro-needle RF and 1540nm erbium glass laser in a single device as a total solution for your aesthetic treatments. These two technologies can work individually or in combination to give the optimal treatment flexibility to all patients. SECRET DUO provides a novel treatment combination that delivers more effective and more efficient clinical results with virtually no downtime.
