COOLTECH[®] FAT FREEZING

TOTAL BODY TRANSFORMATION WITH SIX DIFFERENT SIZED APPLICATORS EQUALS HAPPY PATIENTS.

Cooltech is a European manufactured device that freezes away fatty tissue, with between 20% and 30% of the fat removed in one treatment.

Distributed in Australia by Cryomed, Cooltech is a premium fat-freezing device at an affordable price. It is designed for treating localised fat pockets in various areas of the body. It has six applicators fashioned to adapt to any area of the body, offering a total body contouring treatment.

The different hand pieces are adapted for different areas of the body, such as in areas of curved contours like the back, waist and sub-buttocks, broad areas such as the flanks, love handles and calves, and for fat folds small and large, from the abdomen and back to the arms and knees and even under the chin.

Cooltech technology is based on the proven science of cryolipolysis and has been studied in numerous in vivo and in vitro clinical trials with certified clinical predictability and maximum results.

HOW COOLTECH WORKS

The Cooltech procedure targets and cools fat cells to temperatures that trigger fat cell apoptosis (fat cell death). This process is triggered by cooling fat cells, bringing about

a sequence of events that leads to their destruction and elimination without affecting any of the other surrounding tissue.

The Cooltech device works by gently drawing fatty areas into applicators and cooling the area to the desired treatment temperature for maximum clinical effect. Cooltech treatment is designed to sculpt and remodel the figure comprehensively, hence the applicators to suit all areas of the body.

All of the handpieces work at a temperature between 3°C and -8°C. The difference is due to the temperatures required for various thicknesses of fat folds in different areas of the body.

The Cooltech device allows two handpieces to be applied at the same time thereby optimising treatment times and saving you and your patients valuable time.

The set of all handpieces allows operators to provide full body treatments to their patients with the best results comparable if not better than any other registered cryolipolysis device in the market.

FAST & EFFECTIVE RESULTS

After one treatment patients can expect to see 20% to 30% fat reduction in the treated area. Results can be seen in as little as

15 days after the first treatment, with more dramatic results becoming visible after eight weeks.

Patients usually see enough reduction in one area after one treatment, but if necessary repeat treatments can be done at three months with a maximum of three sessions in total per area.

With Cooltech, there are no needles, incisions, downtime or garments. This easy and reliable treatment allows the patient to resume their everyday life immediately after.

INTERNATIONAL CERTIFICATIONS, PROVEN RESULTS

Cooltech treatments eliminate fat tissue in numerous areas, allowing full body contouring. Essentially, it is a pain free, non-invasive and definitive treatment for the elimination of fat cells.

More than one million Cooltech treatments in more than 40 countries have been performed. Numerous clinical studies have demonstrated its effectiveness, along with very high satisfaction levels across a wide variety of patients.

The Cooltech device complies with the European CE 0051 medical certificate, in addition to the ISO 9001 quality certification and ISO

COOLTECH HAS SIX APPLICATORS THAT ADAPT TO ALL AREAS OF THE BODY, OFFERING A TOTAL BODY TREATMENT

13485 quality standard. In Australia it is entered in the Australian Register of Therapeutic Goods (ARTG), inclusion no: 276394.

Cooltech is manufactured by Cocoon Medical, a Spanish company with its head office in Barcelona. The company's highly skilled researchers and innovators have produced equipment that has gained worldwide attention for its innovation and excellence.

Cocoon Medical's clinical unit helps to ensure the effectiveness and safety of all Cooltech devices on the market, and its clinical monitoring and training unit ensures both the in vitro and in vivo therapeutic excellence of all devices. **AMP**

PRODUCTS

	Indicated for fat folds of 35 mm. It works on areas such as the abdomen, inside of the knees, sides, etc.
Straight HP	
	Indicated for fat located in areas of curved contours. It works on areas such as fat folds on the back, waists, sub-buttocks, etc.
Curved HP	
	Designed for fat folds smaller than 35 mm. Works on areas such as the abdomen, sub-buttocks, back, hips, etc.
Tight HP	
	Indicated for fat folds larger than 35 mm and greater lengths. Designed exclusively for treating the abdominal area.
Double HP	
	Indicated for fat folds larger than 35 mm over broad areas. Works on sides, love handles, calves, etc.
Oval HP	
	Designed for fat folds smaller than 35 mm in reduced areas. Works on areas such as arms, sub-scapula, sub-umbilical accumulations, etc.
Tiny HP
