Scars

- Acne scars
- Hypertrophic scar
- Traumatic scars

Wrinkles

- Deep wrinkles
- Fine wrinkles
- Perioral wrinkles
- Periorbital wrinkles

Skin laxity

Syringoma

Pigmentation

Wart

Nevus

Others

HOW DOES ECO2 PLUS WORK?

Fractional resurfacing by eCO2 Plus promises to reduce skin imperfections and promote collagen regeneration for long term result.

Laser energy micro-ablates tissue leaving small micro-wounds bridged by healthy tissue. Your body's natural healing process stimulates the creation of new tissue and collagen for a younger more youthful appearance of the skin.

Scan QR code to watch video

IMMEDIATELY AFTER

The laser creates micro-ablated columns to stimulate cells. The surrounding healthy tissue promotes rapid healing

2 DAYS POST

Skin is healing creating new collagen during wound healing process.

POST 14 DAYS

Outer layer of skin is completely healed and collagen remodeling continues for up to nine months.

eCO2 Plus Treatment

TREATMENT SESSIONS

Your physician will advise you how many sessions you need depending on our conditions.

CLINICAL RESULTS

Within a few days, new skin will appear that is smoother and more even-toned. Your skin will continue to improve over six to nine months.

PAIN LEVEL

There is a certain level of pain during treatment. However, your doctor will minimize your discomfort by giving topical or oral anesthetic.

SAFETY

The eCO2 Plus is designed with the finest operating features possible to provide you and your doctor the greatest margin of safety during the procedure.
