There is a significant and growing market for anti-ageing skin rejuvenation treatments such as microdermabrasion, skin peels, dermal fillers and face-lifts. PicoSure, with the FOCUS Lens Array, now offers skin revitalisation treatments that deliver unrivalled results that are long lasting and delivered with minimal to no downtime.

PicoSure is FDA cleared and TGA listed for the removal of pigmentation, fine lines, wrinkles and acne scars - making it the treatment of choice!

HOW DOES PICOASURE WORK?

PicoSure with the FOCUS Lens Array harnesses the power of picosecond technology and delivers ultrashort pulses to the skin, stimulating the production of new collagen and elastin. This process will effectively take years off your skin!

The PicoSure Difference

PicoSure with the FOCUS Lens Array now offers the very latest in laser technology for the revitalisation and rejuvenation of the skin.

PicoSure Skin Revitalisation treatments are quick and easy, non-surgical and non-invasive treatments that dramatically improve the appearance, tone and texture of the skin with minimal discomfort and downtime.

FREQUENTLY ASKED QUESTIONS

Am I a good candidate for this treatment?

If you have wrinkles and fine lines around your eyes and mouth or on other areas of your body such as your face, décolletage and even your hands, you may be a good candidate for PicoSure Skin Revitalisation treatments.

How long will the treatment take?

The treatments will vary from patient to patient but generally around 20 to 30 minutes each.

Is the treatment painful?

There will be minor discomfort but most patients tolerate this easily.

How many treatments will I require?

This will be dependent on each individual's needs, but a dramatic change to the skin can usually be noticed after only 1 treatment.

Are there side-effects?

Your physician will supply you with a guideline for pre and post-treatment care.

How long before I can resume my daily activities?

Downtime is minimal. You may experience redness after the treatment which may last less than 1-2 hours. But you can resume daily activities immediately and this is one of the true benefits of PicoSure Skin Revitalisation treatments.

- 🕒 30 minute treatments
- 🕒 No downtime
