[New Cellular Encapsulated Factors]:

A unique complex encapsulating active ingredients used in Mesotherapy.

A Cutting-Edge Encapsulation Technique

Derived from scientific research, multi-layered microscopic vectors in affinity with the skin allow hyaluronic acid and the revitalising ingredients to be absorbed deep into the skin.

+ TARGETED CORRECTION

Filorga's targeted correction solutions are scientifically formulated to address distinct dermatological concerns, enabling a tailored at-home skincare regimen that optimises professional in-clinic treatments.

PREVENTION

ANTIOXIDANT

SERUM

FILORGA's AOX [5] Serum is a cutting-edge antioxidant concentrate designed to protect, correct and visibly revitalise the skin. Formulated with five powerful antioxidants, including Vitamin C, Vitamin E, Ferulic Acid, Melatonin and a polyphenol complex. This advanced serum works synergistically to neutralise oxidative stress, combat environmental aggressors and prevent premature ageing. Inspired by aesthetic medicine, AOX [5] not only shields the skin from daily damage but also actively improves skin tone, texture and radiance. Its lightweight yet potent formula absorbs quickly, delivering a high-performance boost that enhances the effectiveness of professional treatments. By offering AOX [5] Serum in your clinic, you provide clients with a scientifically backed solution for maintaining youthful, resilient skin between procedures, reinforcing your commitment to advanced skincare excellence.

HYDRA-AOX [5]

Intensive antioxidant serum
[NCEF + 3.5% patented
antioxidant complex]

/ FILORGA, 1ST FRENCH LABORATORY IN AESTHETIC MEDICINE*

The story began in 1978 with Doctor Michel Tordjman, a French aesthetic doctor who was fascinated by cell biology. After years of research into skin aging, he invented a **unique polyrevitalising injectable solution** that could act on key skin quality parameters.

/ A RANGE OF ANTI-AGING SKINCARE EFFECTIVE AFTER 7 DAYS⁽¹⁾

In order to make their expertise in aesthetic medicine accessible to everyone, Laboratoires FILORGA created a range of anti-aging skincare formulated with **NCEF [New Cellular Encapsulated Factors]**, a unique polyrevitalising complex encapsulating active ingredients used in injectables.

The advanced formula led to the development of creams that offered real anti-aging performance, with **visible results after 7 days⁽¹⁾**.

/ A FAST TRANSFORMATION OF THE SKIN

Each product is the result of a unique creation process based on the selection of innovative active ingredients inspired by aesthetic medicine techniques.
