

KeraFactor

SKINCARE FOR HAIR

Bolster the deficiencies found in an unhealthy scalp that results in thinning and low-density hair.

The most Consistent Therapy for Thinning Hair

Based on six years of extensive research into the key factors that influence healthy hair and scalp, the KeraFactor formula combines a patented set of eight biosynthetic polypeptides and 2 compounds for scalp revitalisation. Other topical products may only include a few if any, growth factors, and currently, no other commercially available topical products consist of the complete set included in the KeraFactorMD™ formula. Safe for both Men and Women.

NanoFluorosomes, a patented ingredient in KeraFactor, is a naturally anti-inflammatory and anti-androgenic compound. When exposed to red light, its natural fluorescence is activated, further enhancing its ability to combat DHT and promote a healthier scalp, making KeraFactor the perfect companion to Healite II 830nm LED Phototherapy.

KEY FACTORS

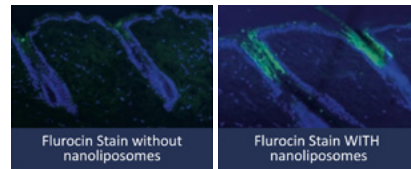

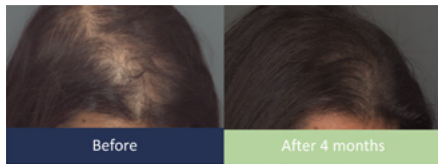

- A patented and proprietary formulation
- Targets deficiencies that can cause poor scalp health
- Contains six biomimetic growth factors, two skin proteins, and 2 compounds, each:
 - Chosen to support scalp and hair health
 - Developed in high concentrations not available from other sources
 - Delivered in a nano-liposome carrier for increased absorption

NANOLIPOSOMES

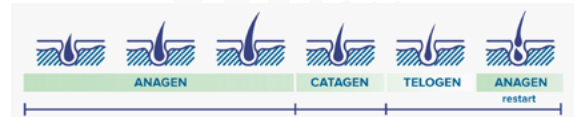

Each growth factor and compound is individually wrapped in a nanoliposome carrier with a particle size of <200nm, which helps ensure absorption to the optimal location. Each nanoliposome contains thousands of specific and hyper-concentrated growth factors essential for scalp and hair revitalisation.

OUR MISSION

- Provide a comfortable and effective treatment of the scalp without injections
 - The procedure takes < 30min
 - There is no downtime or discomfort
- Visible improvement within three to six months
- Hairs seem to grow faster and thicker
- Significant improvements in scalp health and revitalisation
- Long-term improvement continues post series of 6 treatments (up to 12 months)
 - In-office treatment plus at-home care maximizes results

KeraFactor® at Home

Complementary products available to maintain results between clinic sessions.

Scalp Stimulating Shampoo and Conditioner exfoliates and stimulates the scalp and hair using a unique combination of conditioners and growth factors designed to enhance scalp circulation and reinvigorate the scalp and hair.

Scalp Stimulating Solution is a highly concentrated formula of growth factors and compounds designed for hair rejuvenation. This gives the ability to apply a daily dose of growth factors at home.

Introducing the KeraSmooth Hair Brush by KeraFactor

Discover the ultimate solution for delicate detangling with the KeraSmooth Hair Brush. Designed specifically for thinning or fine hair, KeraSmooth features innovative soft-flex teeth that ensure minimal breakage and gentle care for your locks.

KeraRoller

Precision Scalp Microneedling to support your clients at-home scalp care routine. A handheld device designed to optimise the absorption of your favorite topical treatments. Featuring 1,200 stainless steel needles (0.25mm), it gently and painlessly creates microchannels in the scalp to support healthier-looking hair.

Comes in an easy to sterilise format to ensure needles stay clean between treatments.

Lashes by KeraFactor

Introducing Lashes by KeraFactor – a revolutionary lash serum meticulously formulated with a potent blend of scientifically proven ingredients (including PDRN) to nourish, strengthen, and enhance your lashes like never before. Where other lash serums focus on just length, this serum delivers thicker, healthier and longer lashes.

Brows by KeraFactor

Introducing Brows by KeraFactor – a cutting-edge brow serum formulated with a potent blend of nine biomimetic growth factors (including PDRN), meticulously selected to stimulate and nourish brow follicles for fuller, thicker, and more defined looking brows.

Healite II

This high-performance LED system uses 830nm near-infrared light to stimulate cellular repair, reduce inflammation, and increase blood circulation – creating the ideal foundation for healthy hair growth.
