Frequently Asked Questions:

How does Mosaic 3D work?

MOSAIC 3D fractional resurfacing laser treatments are designed to enhance both collagen and elastin in the mid-dermis, leading to revitalized and brightened skin.

What is the benefit of this treatment?

MOSAIC 3D treatments can help to lighten skin tone and remodel dermal collagen which can reduce textural irregularities, and help make the skin look tighter*, brighter and more youthful (*via soft tissue coagulation)

What can I expect from the treatment?

Treatment times may vary, however most treatments can be performed in 45 minutes or less. Ask your provider about what numbing cream can work well for you to help ensure a comfortable treatment experience.
