**FIRM.**  
*Glow.*

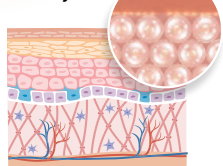

### Why does skin lose firmness?

Collagen is the foundation of youthful skin – responsible for firmness, structure and hydration. From your 20s, collagen naturally declines. By your 40s and beyond, this loss becomes more visible.

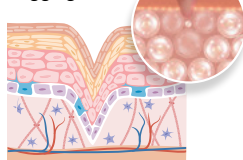

#### That's when you may notice:

- Fine lines and wrinkles
- Loss of elasticity
- Sagging or softening contours
- Dull or tired-looking skin

Younger  
Healthy Skin

Aging and  
Sagging Skin

### How Oligio X helps

Oligio X delivers controlled heat deep into the skin, triggering your body's natural repair response.

#### This helps to:

- Rebuild collagen
- Improve skin density
- Restore firmness and lift

### Ask your clinician:

- Is Oligio X right for my skin?
- How many treatments will I need?
- When will I see results?
- How can I maintain my results?

Start your skin journey today.

Lift. Firm. Glow.

With Oligio X.

# OligioX

### Because your skin deserves a personalised approach

No two skins are the same – and neither are Oligio X treatments.

Your clinician will design a treatment plan tailored specifically to you, combining the right technique, intensity, and timing for your goals.

TECHNOLOGY**

*for  
smoother, tighter, more radiant skin.*

# OligioX

## CLINICALLY ADVANCED SKIN TIGHTENING *with* MINIMAL DOWNTIME

Oligio X uses advanced **radio frequency energy** to gently heat the deeper layers of your skin – stimulating collagen where it matters most.

### The result?

Firmer, smoother, more lifted skin that still looks completely natural.

Unlike treatments that only work on the surface, **Oligio X works from within**, helping your skin rebuild strength, elasticity, and structure over time.

### Why it works

- Targets deeper layers of the skin
- Stimulates natural collagen production
  - Improves firmness and elasticity
- Minimal downtime, maximum confidence
  - Personalised to your skin and goals

*Oligio X is designed to treat multiple concerns in one personalised plan.*

- Fine lines and wrinkles
- Loose or sagging skin
- Loss of facial definition
- Enlarged pores
- Dull or uneven texture
- Double chin or soft jawline

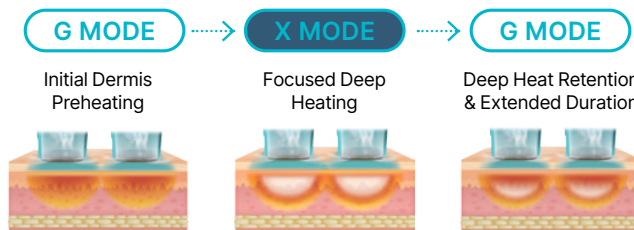

**G MODE** With the gentle heat of G Mode, both upper and lower dermal layers are treated for deeper and longer-lasting effects

**X MODE** Delivers powerful deep tissue heating, maximizing efficacy and extending heat retention time

### What makes Oligio X different?

- Dual treatment modes for customised depth and intensity
- Real-time monitoring for safety and precision
- Advanced cooling system for comfort
- Designed for consistent, natural-looking results

20's Double Chin

Before and 4 weeks post-treatment

30's Double Chin / Facial Contouring

Before and immediately after treatment

40's Nasolabial Folds

Before and 4 weeks post-treatment

50's Facial Skin Elasticity

Before and immediately after treatment

### What to expect

Your Oligio X treatment is tailored to your skin, your goals, and your timeline.

#### During treatment:

- Gentle warming sensation
- Comfortable and controlled delivery
- Typically minimal downtime

#### After treatment:

- Skin may appear slightly flushed (usually resolves quickly)
- Gradual improvement over weeks as collagen rebuilds
- Results continue to improve over time

### Your results timeline

**Immediately:** Instant tightening effect and start of collagen production

**1–3 months:** Visible improvement in firmness and texture

**3–6 months:** Optimal results as collagen regenerates

Regular treatments can help maintain and enhance results over time.

**Talk to your Oligio X clinician for the perfectly designed combination for your skin.**
