

Before & Afters

Sofwave™ is the leader in superior non-invasive energy-based solutions with clinically and scientifically demonstrated technologies to improve skin laxity, lift, and tone.

Sofwave is FDA cleared for improving fine lines & wrinkles, lifting the eyebrow, submental & neck, treating acne scars, improving the appearance of cellulite, and improving the appearance of skin laxity on the upper arms.

Our proprietary SUPERB™ ultrasound technology delivers energy at a depth of 1.5mm in a controlled, parallel, and uniform manner to induce coagulation and subsequent revitalization of the three key elements for regenerated rejuvenated skin: collagen, elastin, and hyaluronic acid.
