

WONDERFACE

PATIENT INFORMATION

What is Wonderface

WonderFace is a next generation equipment for Facial muscle development and skin tightening that combines a powerful **Bipolar Radiofrequency** with **Neuromuscular Emissions**. It is based on the new concept that addresses **Muscle Atrophy**. WonderFace presents an excellent option for those seeking to enhance their facial appearance without resorting to surgical procedures. Its primary aim is to develop facial musculature to restore a more youthful expression, fill hollow areas, reconnect the skin with the musculature, and re-establish facial vascularization.

How does it work?

Inductive Bipolar Radiofrequency generates a temperature increase between 42 - 44 degrees in the deeper skin layers, stimulating collagen and elastin production.

Multi-purpose electrodes are used for energy emission, allowing the current to flow between them and concentrate in the treatment area, producing a more superficial heating ideal for treating fine lines and wrinkles. Unique frequency used: 300-450 kHz.

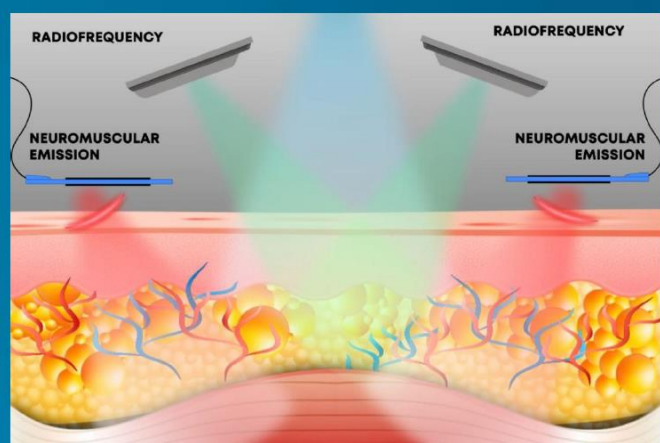

Neuromuscular Emissions work directly on the facial muscles, toning and firming them. WonderFace induces **1500 muscle contractions** in a single 25-minute session.

Treatment benefits?

- 1- Natural Filling of Hollow Areas:** producing a hypertrophic effect, especially in problematic areas such as the zygomatic, frontal, and platysma muscles.
- 2- Deep Facial Rejuvenation:** It works at depths of up to 2cm, restoring muscle tone, vital muscle functions and elevating the cheekbones.
- 3- Improvement of Circulation:** increases blood circulation, achieving more radiant skin. Activating blood circulation improves the overall appearance of the skin and increases tissue oxygenation.

Operating Principle

WonderFace combines powerful Bipolar **Radiofrequency** across the face with synchronized **Neuromuscular** emissions, achieving remarkable results without pain or surgical intervention.

Contraindications

- Pregnant women
- Minors under 18 years old
- People with diseases of any kind: bacterial or viral, flu states
- Epileptics
- People who have recently undergone surgery
- Presence of electrical equipment such as pacemakers, incontinence devices, insulin pumps.
- Skin diseases, dermatitis, inflammations, or irritation... Presence of open wounds, active acne, burns, bruises, ulcers, active infections.

Side effects

Although the treatment is considered harmless, the following side effects may occur which will resolve within 24-48 hours post treatment.

A - Muscular pains

B - Skin reaction to the current passage in the form of transient redness or irritation

For best results

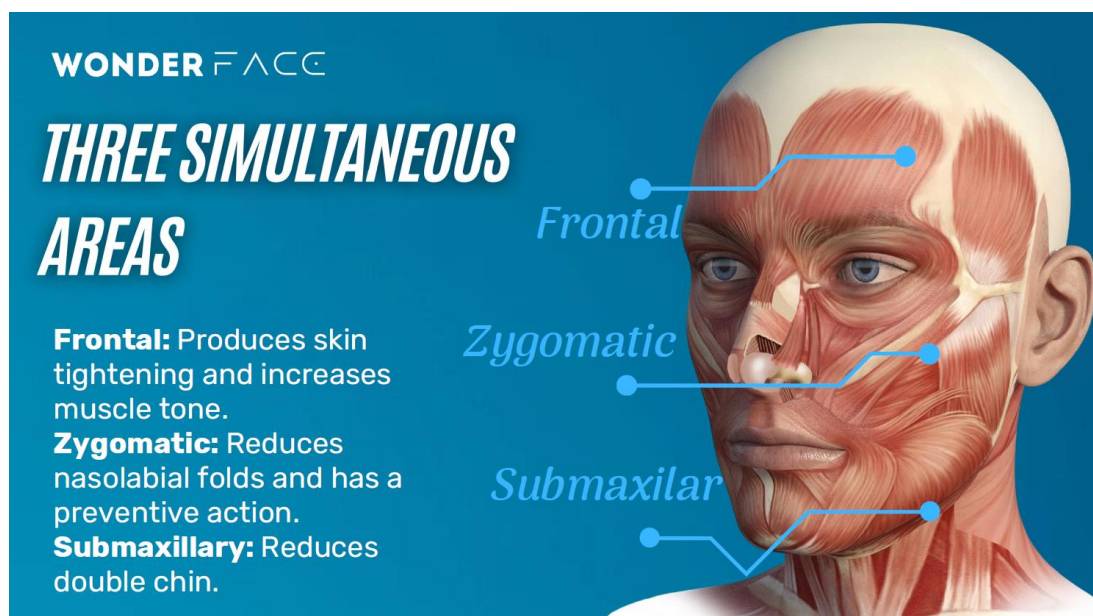

- The treatment time should not exceed total of 25 minutes of any Wonderface treatments.
- Once - twice a week for optimal results x 4-12 sessions (average 6-8 sessions)
- For ongoing maintenance and to ensure lasting benefits, follow-up sessions are advised once or twice a month.
- Diet and hydration for electrolyte and hydration abundance pre-treatment.

Treatment areas

Frontal: Produces skin tightening and increases muscle tone.

Zygomatic: Reduces nasolabial folds and has a preventive action.

Submaxillary: Reduces double chin.

Treatment Programs

MUSCLE TONING: *Ideal Candidate: Muscle Contouring and Firmness for Tissue Sagging Concerns*

This treatment enhances the strength and resilience of **facial muscles**, improving facial **contour and firmness**. By stimulating deep muscle layers, it promotes a defined look that contributes to a sculpted face shape. Consistent toning reduces **sagging** and provides a youthful, naturally lifted appearance over time.

LIFTING: *Ideal Candidate: Skin Tightening for Skin Lifting and Facial Symmetry Concerns*

Focused on raising and tightening **sagging skin**, lifting treatments restore natural facial contours by promoting collagen production. The result is a firmer, smoother, and more youthful look. This approach counteracts gravitational effects, giving the skin a rejuvenated and revitalized texture while enhancing overall **facial symmetry**.

BRUXISM: *Ideal Candidate: Clenching or grinding affecting masseters for pain management*

This treatment relaxes the jaw muscles affected by **chronic clenching or grinding** (bruxism), helping to ease tension and prevent associated discomfort. Regular sessions can reduce jawline bulkiness, improve facial symmetry, and lessen clenching-related lines, enhancing the harmony of the lower face.

SKIN TEXTURE: *Ideal Candidate: Smoothing Superficial and fine lines for Crepeyness Concerns*

Designed to **refine and smooth the skin's surface**, this treatment minimizes **fine lines**, reduces roughness, and balances tone. By enhancing cell renewal and collagen, it leaves skin visibly softer and more even, giving it a polished, radiant appearance that's smooth to the touch.

DRAINAGE: *Ideal Candidate: Lymphatic Drainage and Post Surgical Healing Concerns*

By promoting lymphatic flow, this treatment effectively **reduces facial puffiness** and **dark circles**. It aids in the elimination of toxins and excess fluids, reducing bloating and giving a refreshed, brightened appearance. Improved circulation brings more oxygen to cells, enhancing skin's natural glow and vitality.

REAFFIRMATION: *Ideal Candidate: Skin elasticity and deeper for and Skin Sagging concerns*

Reaffirmation focuses on reinforcing skin **elasticity and firmness**, reversing the effects of laxity. Through enhanced collagen and elastin production, it improves skin's structural integrity, creating a more lifted and resilient look. This process fights against **wrinkles and sagging**, restoring a smooth, youthful texture.

NASOGENIAN: *Ideal Candidate: Nasolabial fold and mid face hollowing concerns*

Targeting the nasolabial folds, this treatment softens deep expression lines, creating a smoother transition between the cheeks and mouth. By adding **volume** and firmness to the area, it reduces the appearance of "**smile lines**," leading to a refreshed, well-rested, and more youthful expression.

Treatment Objectives

WONDERFACE

WONDERFACE OBJECTIVES:

1 Restoration of Rejuvenated Emotional Expressions

Facial muscles are essential for non-verbal communication and our social interactions and to express emotions.

2 Definition of Facial Features

Skin sagging affects the overall appearance of the face. Increased facial muscle mass results in a tightening effect and texture improvement.

3 Stimulation of Collagen and Elastin

WonderFace's powerful bipolar Radiofrequency stimulates the natural production of collagen and elastin, maintaining firmness and elasticity, and reducing the appearance of fine lines and wrinkles.

4 Bruxism

WonderFace's generalized muscle relaxation work reduces the presence of bruxism, helping to maintain vitality and a healthy expression.

Treatment Advantages

1. Non Surgical Facial Rejuvenation

More people are seeking non-invasive facial treatments, looking for more harmonious and natural results.

2. Facial Muscle Toning

The importance of muscle as the foundation of body and facial beauty is demonstrated, and methods to develop musculature in a pleasant and effective way are sought. WonderFace's neuromuscular emissions work directly on the facial muscles, toning and firming them. This is especially beneficial for areas such as the zygomatic, frontal, and platysma muscles.

3. Visible and Painless Results

Patients experience visible results after WonderFace sessions, with smoother, firmer, and rejuvenated skin. Unlike some painful treatments, WonderFace is comfortable and non-invasive.

4. Improvement of circulation and oxygenation

WonderFace Treatment enhances blood circulation and oxygenation of facial tissues, contributing to healthier, more radiant skin.
