

AQUAPURE II

MULTI-FUNCTIONAL

DERMAL HYDRO FACIAL

SMART GENIUNE
FACIAL CARE SYSTEM

FREQUENTLY ASKED QUESTIONS

HOW DOES THE AQUAPURE II WORK?

AQUAPURE II is a multifunctional facial and body care device combining microdermabrasion system with solution delivery, microneedling and LED therapy into one single system for the treatment of various skin concerns.

WHAT CONCERNS ARE SUITABLE FOR AQUAPURE II TREATMENTS?

Due to the non-invasive nature of AQUAPURE II treatments, almost anyone who desires glowing and healthy skin is an appropriate candidate. Some of the most common skin concerns treated by AQUAPURE II include fine lines, UV-induced skin damage, problematic skin and dehydration by enhancing skin tone and texture on both face and body.

WHAT PREPARATION OR DOWNTIME IS REQUIRED FOR AQUAPURE II TREATMENTS?

There are no special requirements prior to an AQUAPURE II treatment other than removing makeup and cleansing the skin. Post-treatment, patients should avoid wearing makeup for 24 hours and ensure the application of sunscreen. Saunas and strenuous exercise should be avoided for approximately 1 week.

WHEN DO RESULTS BECOME APPARENT?

Immediate benefits are noticed after treatment, with gradual improvements also seen as new collagen is produced. A course of six to eight treatments is recommended, followed by quarterly maintenance treatments.

HOW LONG DO TREATMENTS WITH AQUAPURE II TAKE?

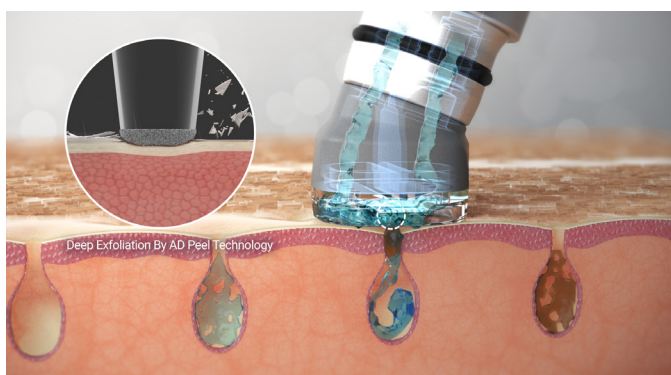

A complete AQUAPURE II treatment can take as little as 30 to 45 minutes with no downtime.

WHAT IS AQUAPURE II?

AQUAPURE II is a multi-functional facial and body care devices that fuses microdermabrasion, micro-needling and LED therapy into a single treatment to refresh and rejuvenate the skin.

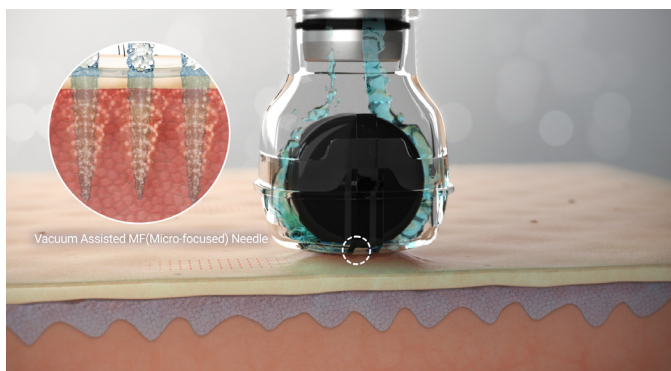

AD TIP

The surface of skin is vacuumed away, removing whiteheads, blackheads, and dead skin while AQUASOLUTION is delivered into the deeper layers of the skin, supplying hydrating agents into the skin.

MF NEEDLE

Making a channel into the skin with tiny sterilized needles for the delivery of rejuvenating solution and facilitating collagen regeneration.

AQUASOLUTION RANGE

PEEL+

The first step of treatment is the process of non-irritating skin scaling which facilitates accelerated exfoliation, the removal of dead skin cells and other impurities.

REJUVE+

The final step of treatment promotes skin elasticity by inducing collagen and elastin regeneration and improving the inhibition of moisture loss by improving water retention.

SEBO+

The second step of treatment is for sebum dissolution, treatment of blackheads, and effective pore control. This assists the skin to balance between oily and moisture textures.

CLEANSYS

To provide a convenient cleaning agent specifically made for the needs of the system, CLEANSYS assists in easy maintenance procedures for the AQUAPURE.

Aquapure delivers powerful natural ingredients directly to various layers of your skin to promote a rejuvenated, brighter and more glowing complexion.

Honey Extract

Accelerates the rejuvenation and healing process for a rapid recovery.

Centella Asiatica

Peptide Complex

Boosts collagen & to promote heal
