

FREQUENTLY ASKED QUESTIONS

HOW DOES IPL-SQ REJUVENATE THE SKIN?

IPL-Sq's true square pulse system is delivered in waves at the right intensity to act on the targeted skin damage. The bursts of energy are delivered in such short pulses that they are easily tolerated and produce excellent clinical results.

WHAT RESULTS CAN I EXPECT?

You can see results straight away, peaking at 2 weeks, then the treated areas will continue to improve for up to a month or more. After this time you may have additional treatments to further improve your outcome.

WILL IPL-SQ SUIT MY SKIN TYPE?

IPL-Sq can be used successfully on most skin types. As well as providing all-round skin rejuvenation, IPL-Sq is an excellent choice for treating skin redness, visible vessels and pigmentation.

HOW WILL THE TREATMENT FEEL?

You will be aware of the pulses of light flashing. You will feel a slight sting, as if a rubber band is being snapped against your skin, but this is minimal thanks to IPL-Sq's built-in adjustable contact cooling.

For best ongoing results, you should always protect your skin from direct sun exposure. Always cover up and use a good SPF sunblock when out in the sun.

IPL-SQ

INTENSE PULSED LIGHT FOR SKIN REJUVENATION

TRUE SQUARE PULSE SYSTEM

- Treats most visible signs of skin ageing
- Encourages collagen regeneration
- Helps restore a youthful, clear complexion
- Surrounding tissue is not damaged

IS YOUR SKIN TIRED & DAMAGED?

IPL-Sq is the efficient and comfortable way to help combat skin ageing. Refresh your skin from the inside for lasting rejuvenation.

STEP 1

The skin is cleaned and a clear coupling gel will be applied to the treatment area. Your eyes will be covered with eye pads and you will be instructed to keep your eyes closed.

STEP 2

The handpiece is placed on the surface of your skin and you will be aware of the pulses of light flashing. You will feel a slight snap against the skin. This is made minimal due to IPL-Sq's advanced Contact-Cooling system.

STEP 3

Light energy penetrates deep into the skin with intense pulses of light, which stimulate the skin to produce more collagen, helping to fill out lines and wrinkles, and breaking down unwanted pigmentation.

In some circumstances, IPL-Sq treatment might need to be postponed. You should seek medical advice if any of the following apply to you:

- You have tanned skin
- You have a disease that is stimulated by light (e.g., Epilepsy)
- You are using photosensitive drugs (e.g., Roacutane)
- You are pregnant

IPL-SQ RESTORES YOUR BEST COMPLEXION

Skin ageing is caused by both intrinsic (the body's internal ageing process) and extrinsic (environmental and lifestyle) factors.

Now, there's a simple, effective way to help your complexion combat the ravages of time. IPL-Sq is the most advanced and acclaimed technology for non-invasive skin rejuvenation.

IPL-Sq Photo Rejuvenation can make a dramatic difference to the appearance of your skin. It can treat multiple conditions simultaneously, making it an ideal skin rejuvenation treatment. It stimulates collagen regeneration to improve volume and elasticity, fades age spots and sun damage, treats acne, rosacea, spider veins and broken capillaries.

It works by penetrating deep into the skin with intense pulses of light, using a series of filters to direct the light accurately to the target.

It is capable of treating the entire face, and is therefore a great tool in helping to restore a youthful, clear complexion.

IPL-Sq treatment is fast and comfortable—with no downtime. You can return to your normal activities immediately after treatment, with predictable and dramatic results.

Successive treatments continue to produce improvements.
