

## FREQUENTLY ASKED QUESTIONS

### HOW DOES ACROMA ACNE PEEL WORK?

Acne originates in the dermis layer of your skin, where the sebaceous glands produce too much sebum (oil), clogging the pores and causing inflammation that results in acne. Acroma's dual action attacks these problems deep in the dermis as well as on the surface, unplugging pores, shrinking the sebaceous glands, gently removing the topmost layer of dead skin cells and stimulating new skin growth.

### HOW MANY TREATMENTS WILL I NEED?

Your general skin health will start to improve from the first treatment. Sebum levels and the number of acne pimples will start to reduce. Typically, three to four treatments spaced two to three weeks apart achieves dramatic results.

### WHAT RESULTS CAN I EXPECT?

Your skin type and the severity of your acne will determine the degree of improvement in your condition. Most patients see some improvement after the first treatment. Visible acne should be reduced, and you may also notice an improvement in general skin tone and texture. Acroma treatment can also help shrink large pores and reduce the appearance of some acne scars.

### HOW LONG WILL THE RESULTS LAST?

While Acroma is extremely effective and long lasting, like other laser treatments, its results may not be permanent. To maintain the results, both on the surface and in the deeper layers of your skin, follow-up treatments approximately every three months are recommended. You will be given instructions to help maintain and maximise the benefits of your treatment.

For best ongoing results, you should always protect your skin from direct sun exposure. Always cover up and use a good SPF sunblock when out in the sun.

## ACNE PEEL WITH ACROMA

FREQUENCY DOUBLED Q-SWITCHED ND:YAG LASER

- Reduces all types of acne
- Controls oily skin
- Shrinks pore size
- Safe for inflamed acne
- Reduces redness from acne marks
- No medication necessary
- Reduced recurrence and inflammation

## TACKLE ACNE AT ITS SOURCE

ACNE is an ongoing problem for 85% of all teenagers. More than a third of adults also suffer from recurring and persistent acne.

Acroma offers a reliable and lasting solution to all types of acne.

### TYPES OF ACNE PIMPLES

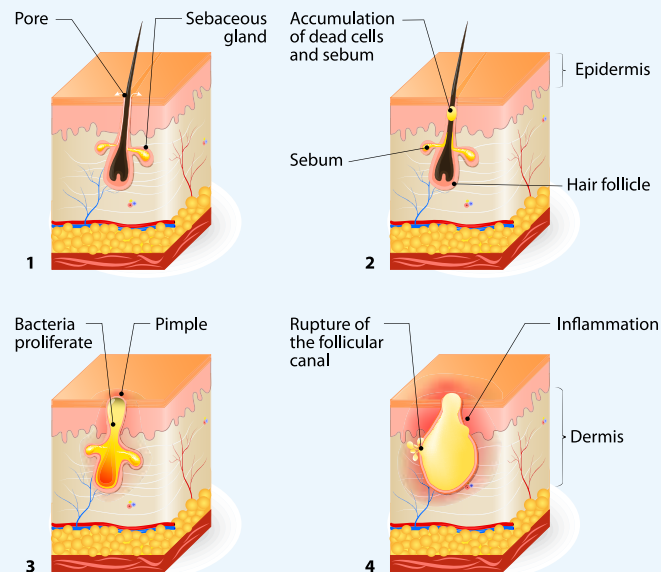

Unlike ordinary laser treatments, Acroma treatment is fast and comfortable—with no downtime. You can return to your normal activities immediately after treatment, with predictable and dramatic results.

Acroma treatment offers a reliable and long-lasting solution to stubborn and persistent acne.

## ACROMA Q-SWITCHED LASER FOR TREATING ACNE

Laser light energy is delivered to the sebaceous glands, where it heats and destroys the bacteria-causing agents. This helps to reduce inflammation, reducing the pimple and stimulating skin cell regeneration.

### ACNE FORMATION

## RELIABLE & LASTING SOLUTION

### STEP 1

The skin is cleaned and a special photo-enhancing lotion may be applied to the treatment area.

### STEP 2

Light energy is delivered deep into the skin, reaching the sebaceous glands. This helps to reduce inflammation and stimulates skin cell regeneration.

### STEP 3

The laser gently peels the old skin away, destroys bacteria, unplugs and shrinks pores, and stimulates new skin growth.
