CUSTOMISED NON-INVASIVE TREATMENTS TO MEET YOUR DESIRED GOALS

How does Ultraformer III work?

Ultraformer III utilises high-frequency-focused ultrasound (HIFU) energy to instantly contract collagen fibers and promote long term collagen growth for a natural, lifted look without the downtime.

Ultraformer III is the most optimal and favourable non-invasive ultrasound device, that lifts and tightens the face for a youthful complexion, whilst tightening and contouring the body. Through the use of precise HIFU-powered transducers, it is designed to remodel collagen to reduce facial wrinkles and improve skin laxity or tightening of body tissues

WHAT AREAS OF THE BODY CAN ULTRAFORMER III TREAT?

FREQUENTLY ASKED QUESTIONS

What to expect during the treatment?

During the treatment session you will feel a slight discomfort associated with the treatment, but this will vary in individuals and is only temporary whilst undergoing the treatment session.

How long does the treatment take?

Treatments take only 25-45 minutes, depending on which areas are being treated.

What to expect after the treatment?

Your skin may appear red after the treatment, but this will subside after a few hours.

How many treatments will I need?

This varies from patient to patient, you will notice that visible immediate results are seen after just 1 treatment, with ongoing improvements for up to 6 months and lasting a year or more*.

“The Ultraformer III is the world’s number one ultrasound lifting, tightening and contouring system.”

* Individual results may vary.

TREATMENT INDICATIONS:

- Lift and tighten loose skin
- Jowl lifts/jawline contouring
- Decrease neck lines and wrinkles
- Lift drooping eyebrows and eyelifts
- Body contouring
