BIONUTRIGLOW PROTOCOL FOR SKIN REJUVENATION

LIGHT PEEL

NCTF BOOST

+/-

Needles of 1,5 mm

B3 RECOVERY

BIONUTRIGLOW PROTOCOL FOR SKIN REJUVENATION

PROTOCOL OF 3 SESSIONS FOR A BEAUTIFUL SKIN, 1 MONTH

NCTF[®] BOOST 135 HA provides the essential ingredients for optimal fibroblast activity. Three sessions are recommended to improve skin quality. Additional sessions can be used to maintain the result.

HYALURONIC ACID
CONCENTRATED

STERILE PRODUCT

pH BALANCE

ISO-OSMOLARITY

BIONUTRIGLOW PROTOCOL DESIGN

> 1/ **LIGHT PEEL®**: superficial chemical peel

Apply the PRE PEEL solution to balance the skin's pH.

Apply 3ml of the LIGHT PEEL using a brush and leave on for 3 minutes.

Apply the POST PEEL solution to neutralize the pH, then rinse off with water.

2/ **NCTF® BOOST 135 HA**: for local application or with a needle pen

Apply NCTF® BOOST 135 HA using a cotton pad and leave on for 5 minutes.

Apply NCTF® BOOST 135 HA then use a needle pen (36 micro-needles of 1,5mm)

3/ **B3-RECOVERY CREAM**: ideal post-intervention

Apply the B3-RECOVERY CREAM to soothe and replenish the skin.

BIONUTRIGLOW STUDY 2018- TOPICAL

BIONUTRIGLOW STUDY- TOPICAL

SUBJECTS: 10 subjects, 60,8 mean age

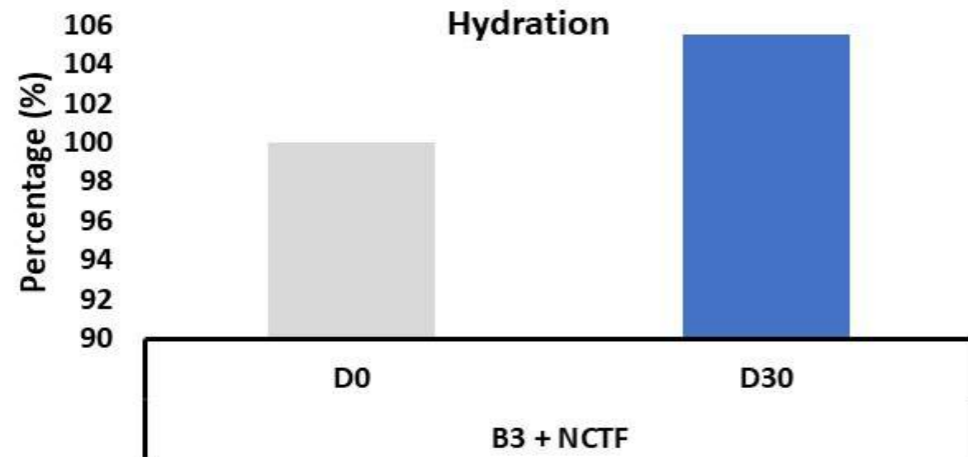

PROTOCOL: 1 month/ 3 sessions

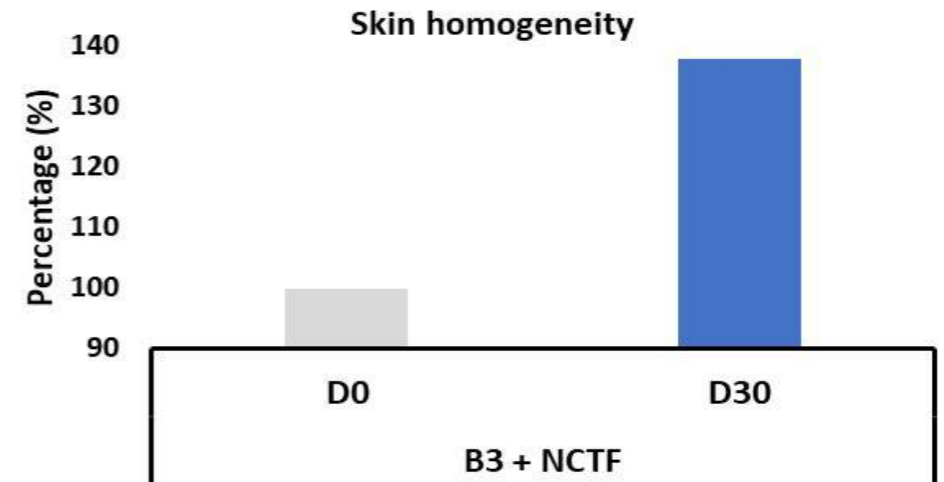

PROPERTIES: Hydration, Radiance, Homogeneity, Skin Texture, Wrinkles

INSTRUMENTAL EVALUATION AFTER 3 SESSIONS- TOPICAL

1) **HYDRATION:** deep hydration was significantly improved (Moisturemeter EpiD)

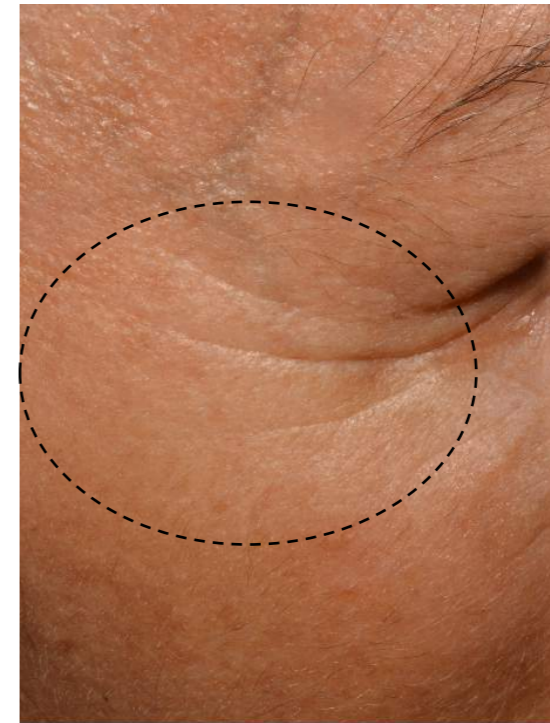

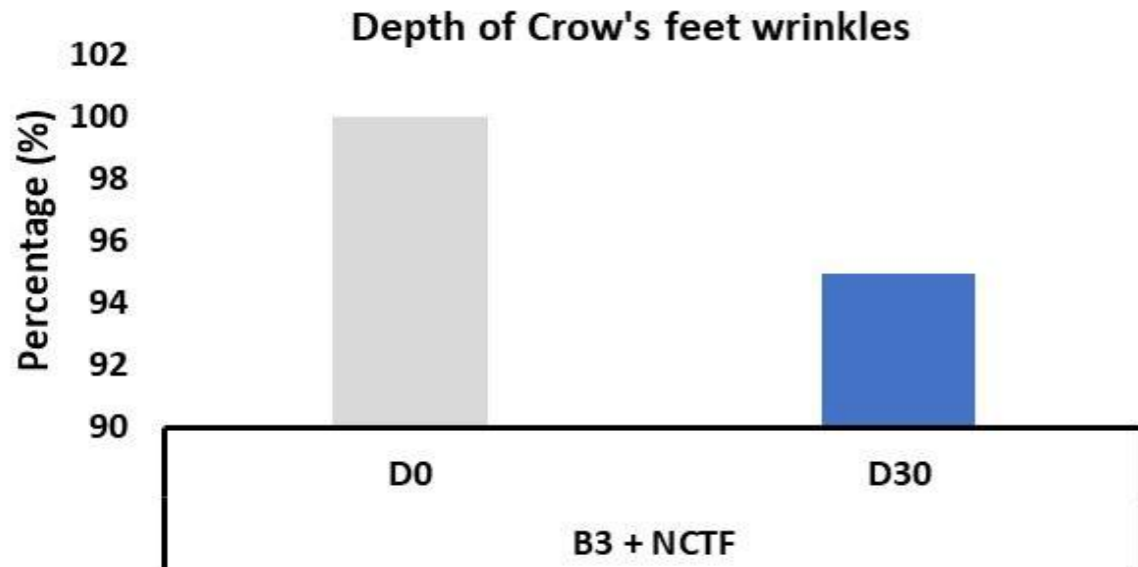

2) **SKIN HOMOGENEITY :** a significant improvement on skin homogeneity was observed (Skinolorcatch)

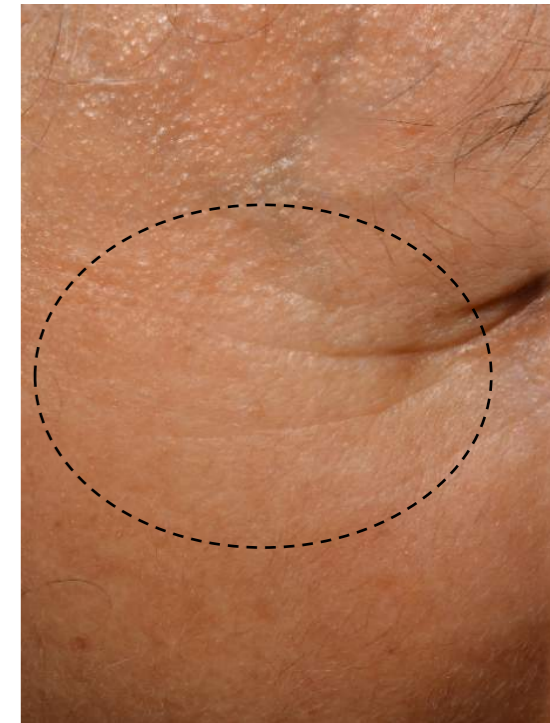

INSTRUMENTAL EVALUATION AFTER 3 SESSIONS- TOPICAL

3) **WRINKLES (depth)**: an improvement on the depth of crow's feet was observed (LifeViz micro®)

BIONUTRIGLOW STUDY 2018- NEEDLE PEN

BIONUTRIGLOW STUDY- WITH NEEDLE PEN

SUBJECTS: 10 women, 55 mean age

PROTOCOL: 1 month/ 3 sessions, split face

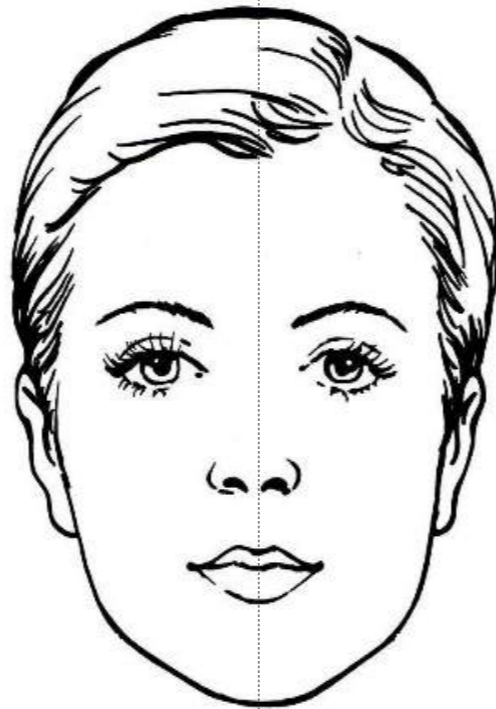

PROPERTIES:

- Hydration after a mechanical stress,
- Radiance,
- Homogeneity,
- Skin Texture,
- Wrinkles

INSTRUMENTAL RESULTS AFTER 3 SESSIONS- NEEDLE PEN

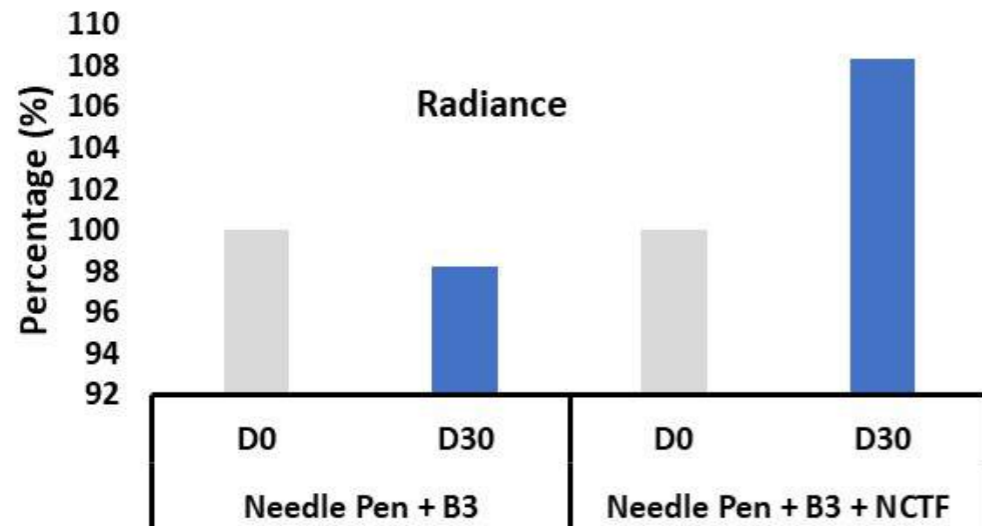

1) **HYDRATION:** the hydration was less disturbed after the micro-needling in the group treated with Light-Peel & NCTF & needle pen vs needle pen alone (Moisturemeter EpiD)

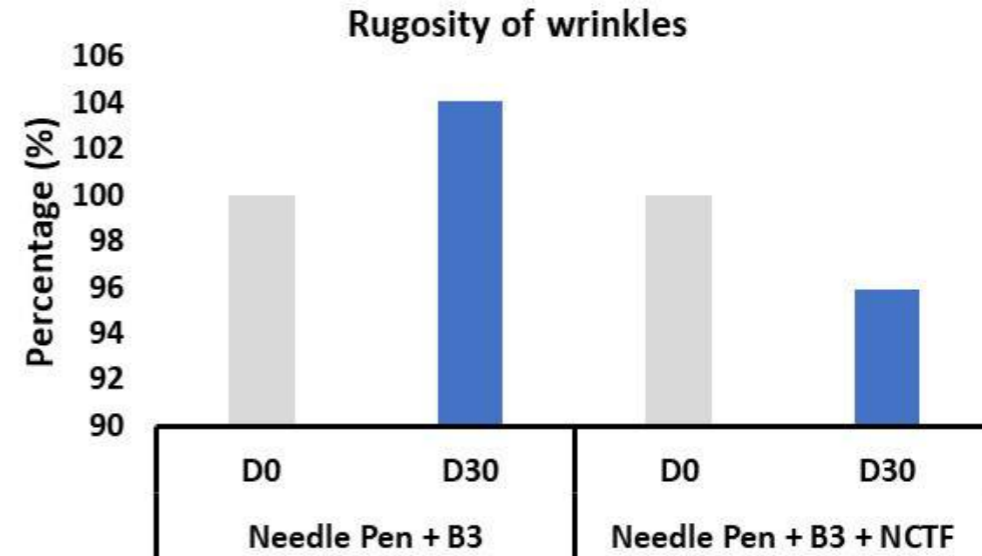

⇒ NCTF+PEEL prevents the loss of hydration due to a mechanical stress (needle pen)

INSTRUMENTAL RESULTS AFTER 3 SESSIONS- NEEDLE PEN

2) **RADIANCE** : an improvement of radiance was observed in the group treated with Light-Peel & NCTF vs needle pen alone (Glossymètre GL200)

3) **WRINKLES** (rugosity): an improvement on crow's feet was observed in the group treated with Light-Peel & NCTF vs needle pen alone (LifeViz micro®)
