

KeraFactorMD in Office Treatment Pre & Post Care

Pre Treatment

- ☒ Patients should arrive with clean, dry hair. We ask patients to wash their hair the night before their appointment and avoid any hair care or styling products. Dry shampoo and root color boosts should be avoided on the day of treatment.
- ☒ Patients should avoid sun on the scalp 1 week prior to treatment.
- ☒ Patients should avoid coloring their hair 48 hours prior to treatment.

Post Treatment

- ☒ KeraFactor® has no scent, does not dry hard, and has a neutral PH making it very patient-friendly. Once the hair and scalp dry naturally, patients can resume normal activities, including the application of hair products.
- ☒ Patients leave the KeraFactorMD Serum in their hair until the following day, and then the patient may wash their hair.
- ☒ Patients should wait to color their hair 48 hours after KeraFactor® treatment.
- ☒ Use KeraFactor® Scalp Stimulating Solution, KeraFactor® Scalp Stimulating Shampoo & Conditioner, and other products as directed by your practitioner.
- ☒ After the treatment, you may notice hairs in the telogen phase (resting phase) may shed due to the slight trauma from the laser. This does not occur regularly but do not be alarmed if it occurs. Please notify your provider.
