## PATIENT AFTERCARE

After having a treatment with the Dalyance, the tissue in the treated area may feel warm, tingly, itchy or slightly sensitive for up to 24 hours.

**Note** The length of redness or sensitivity may range from patient to patient.

**The following aftercare precautions should be followed post Dalyance treatment.**

- Avoid overly hot showers, baths, saunas for 24 hours post
- Avoid direct sunlight on tissue of treated area for 48 hours post
- Avoid scratching or picking area of treatment
- Refrain from applying any lotions to the area for 24 hours post
- Patient should increase their water intake to 8 glasses per day for the duration of treatment plan
- Patients should keep a healthy balanced diet for the duration of treatment plan
- Patient should go for a 20 minute walk post treatment

If the patient experiences itching post treatment they may take anti-histamine medication.
